

The architecture value stream in Avancier Methods

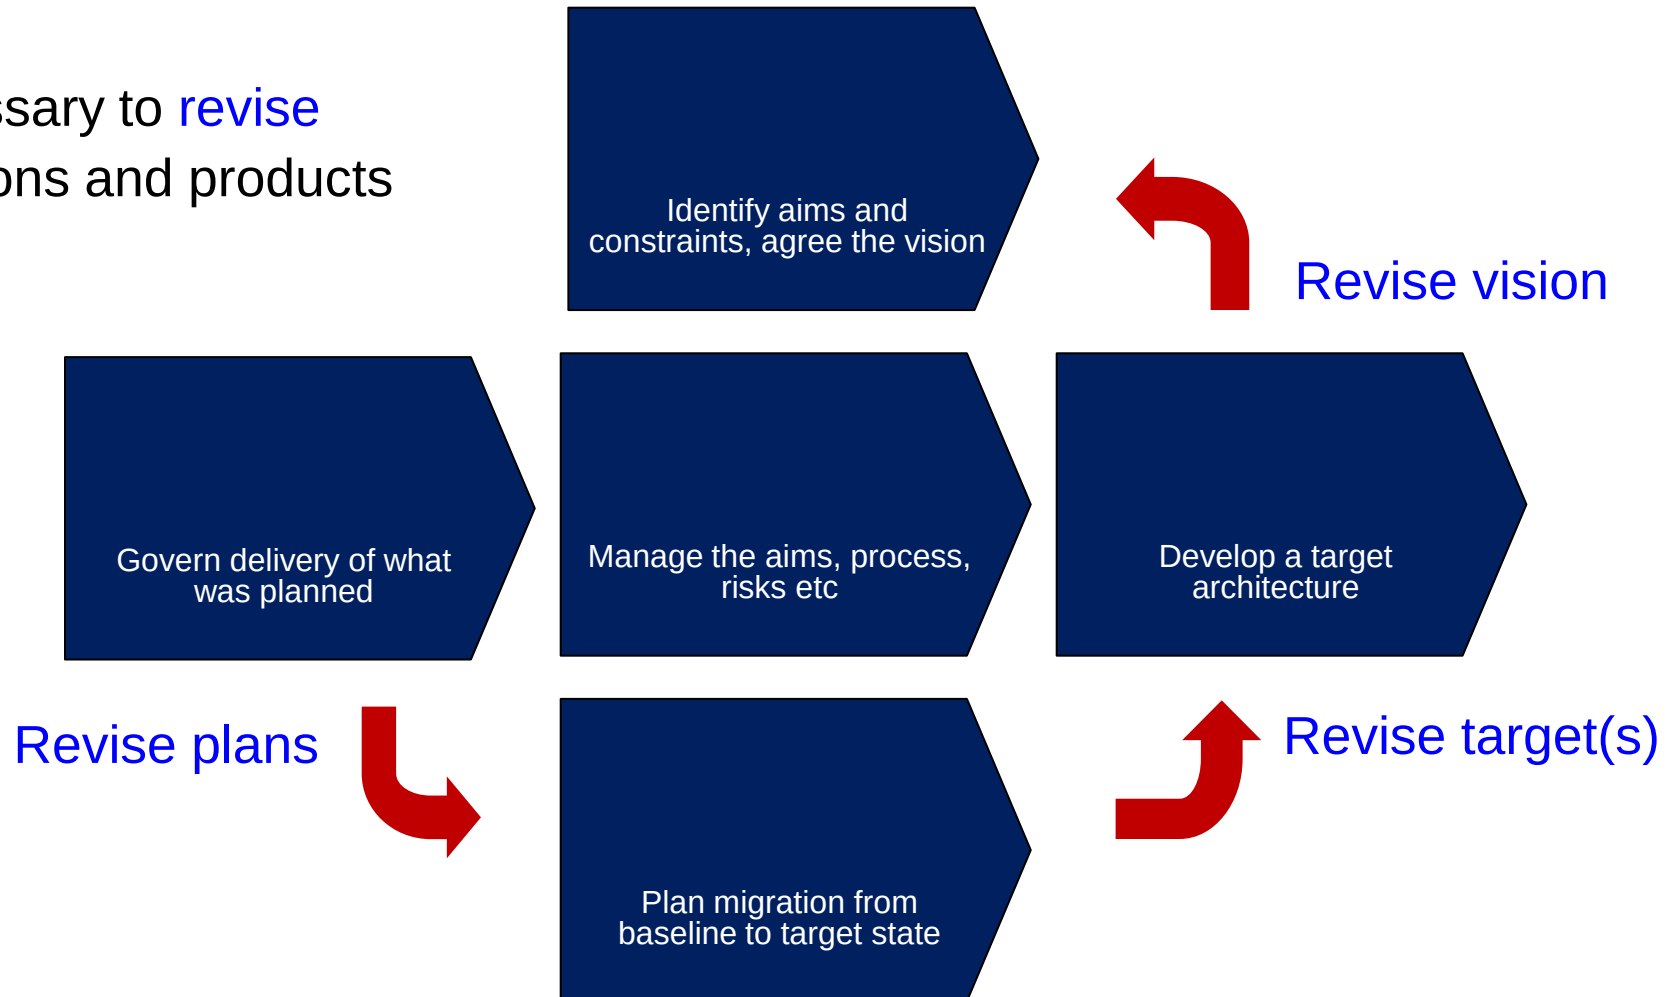

Avancier Methods 1st level

Key milestone products

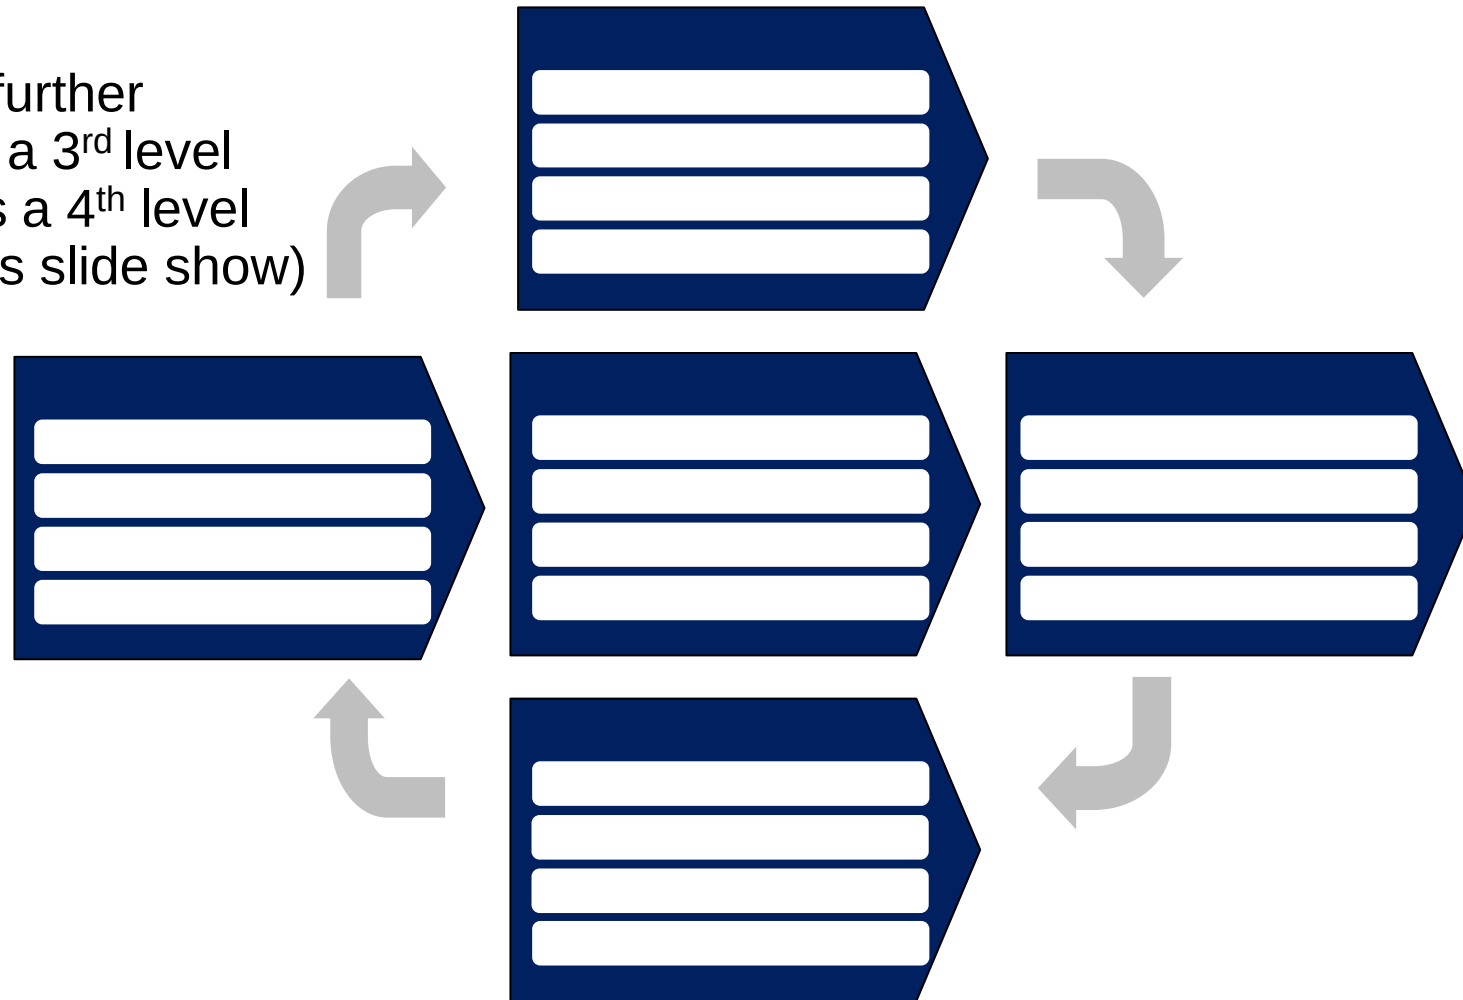

Not a strictly waterfall process

It often necessary to **revise** earlier decisions and products

Avancier Methods 2nd level

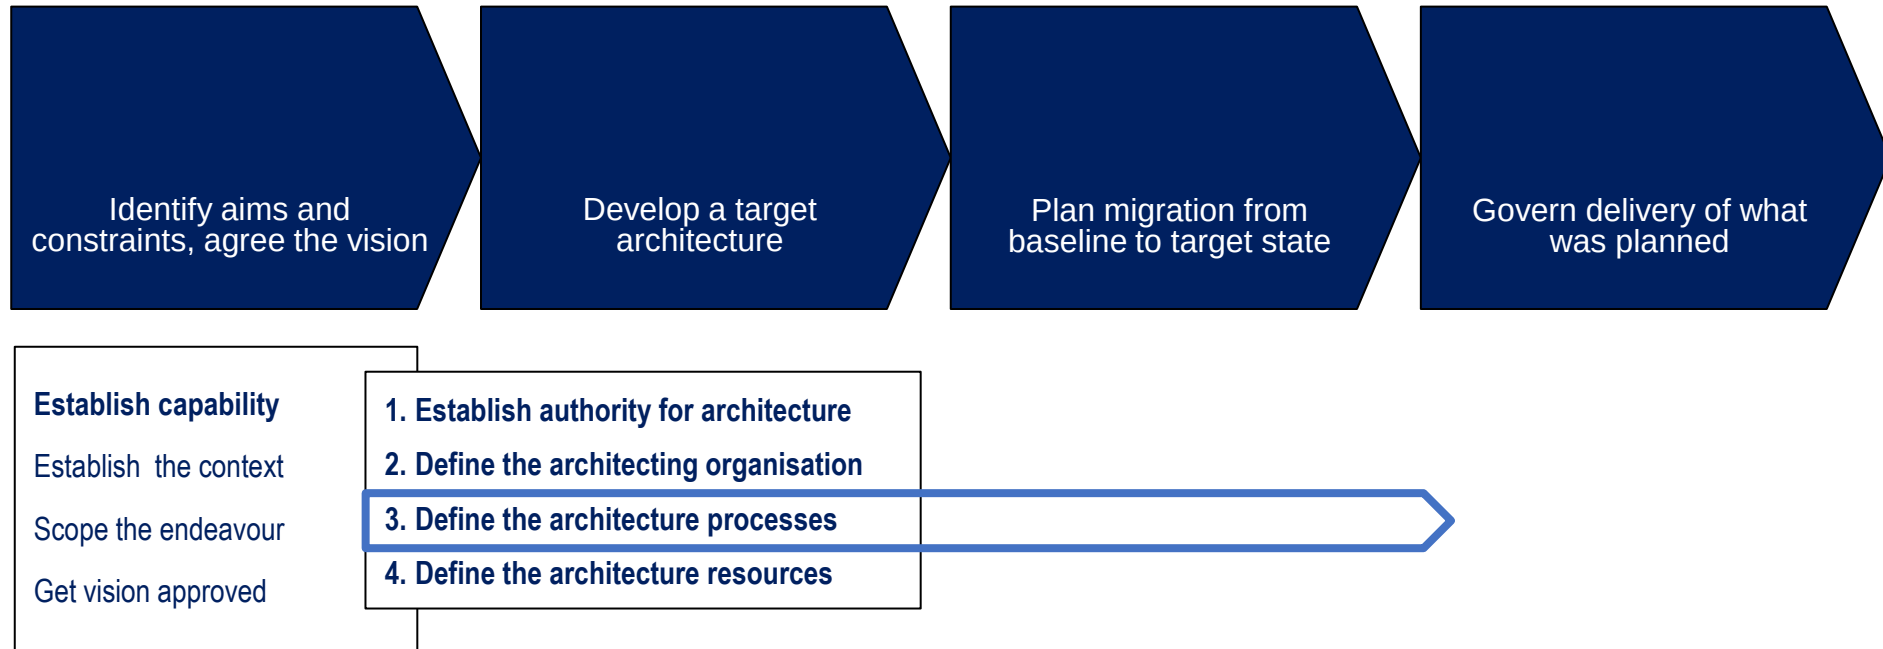

The process is further decomposed to a 3rd level (and sometimes a 4th level not shown in this slide show)

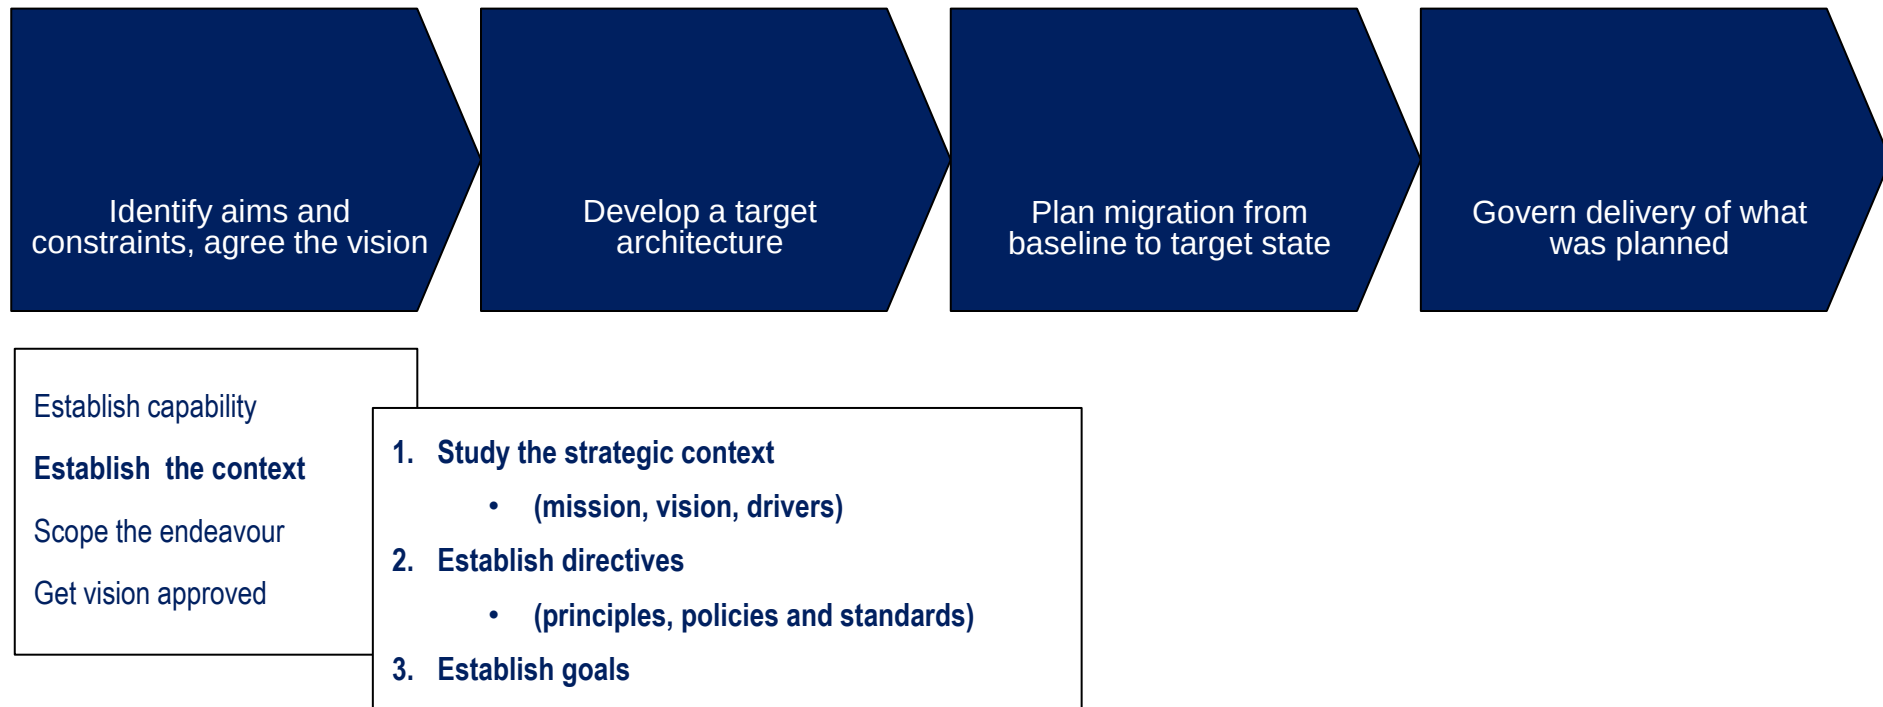

The same method presented as a value stream

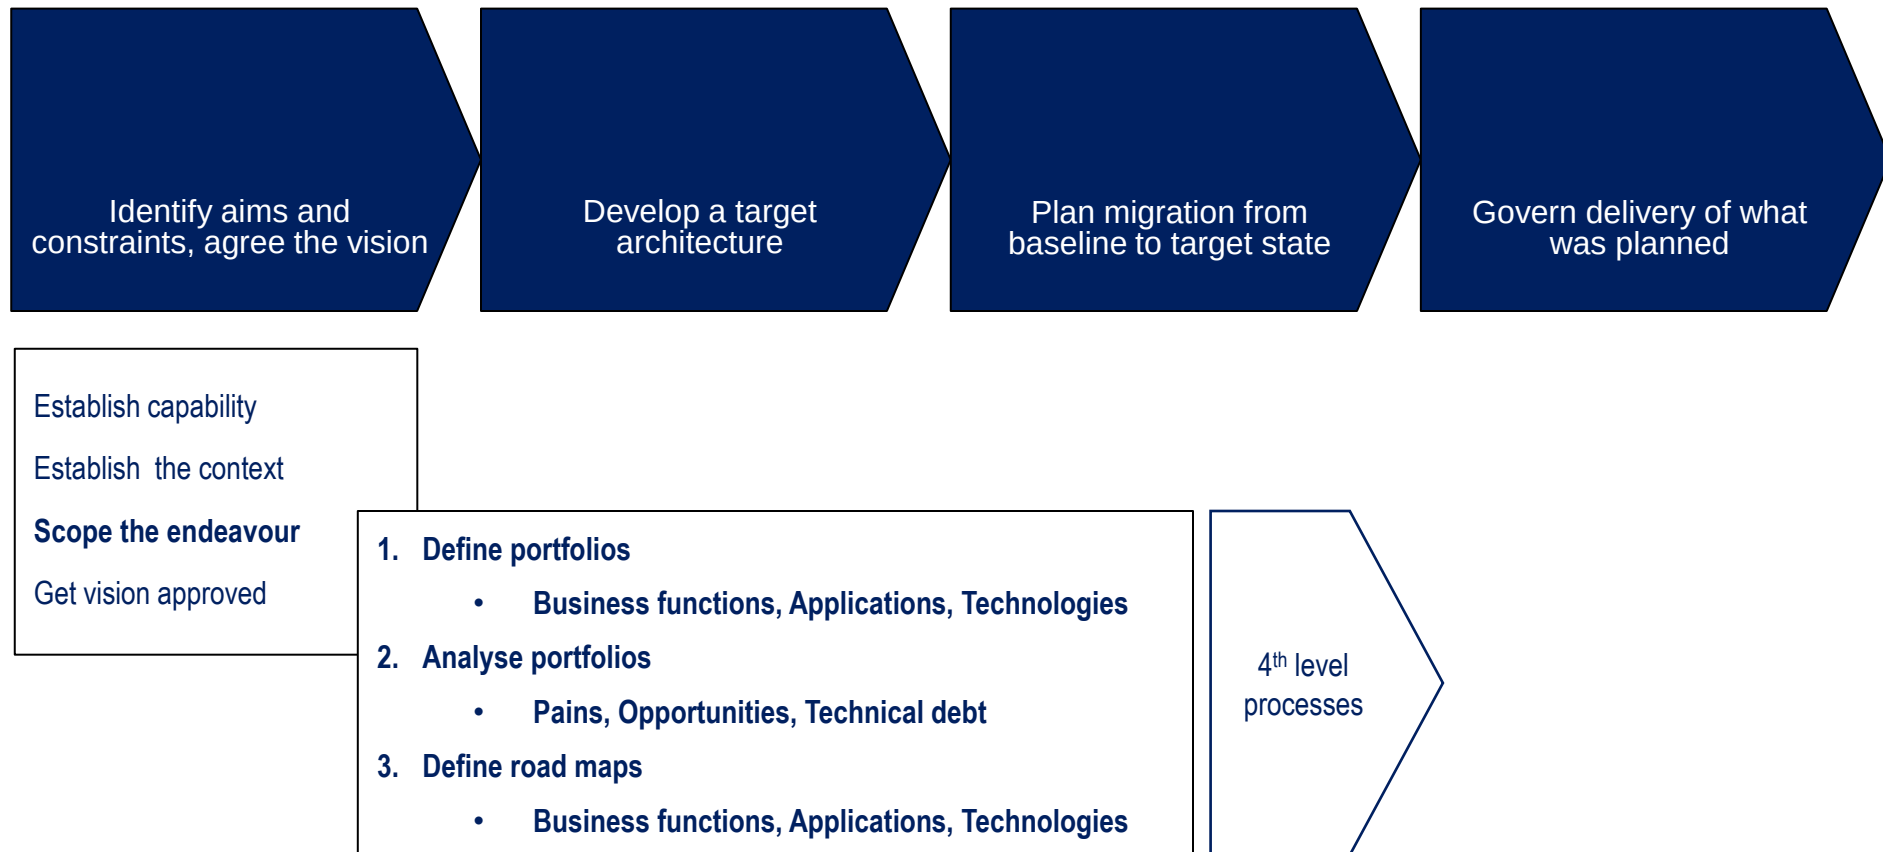

Establish capability

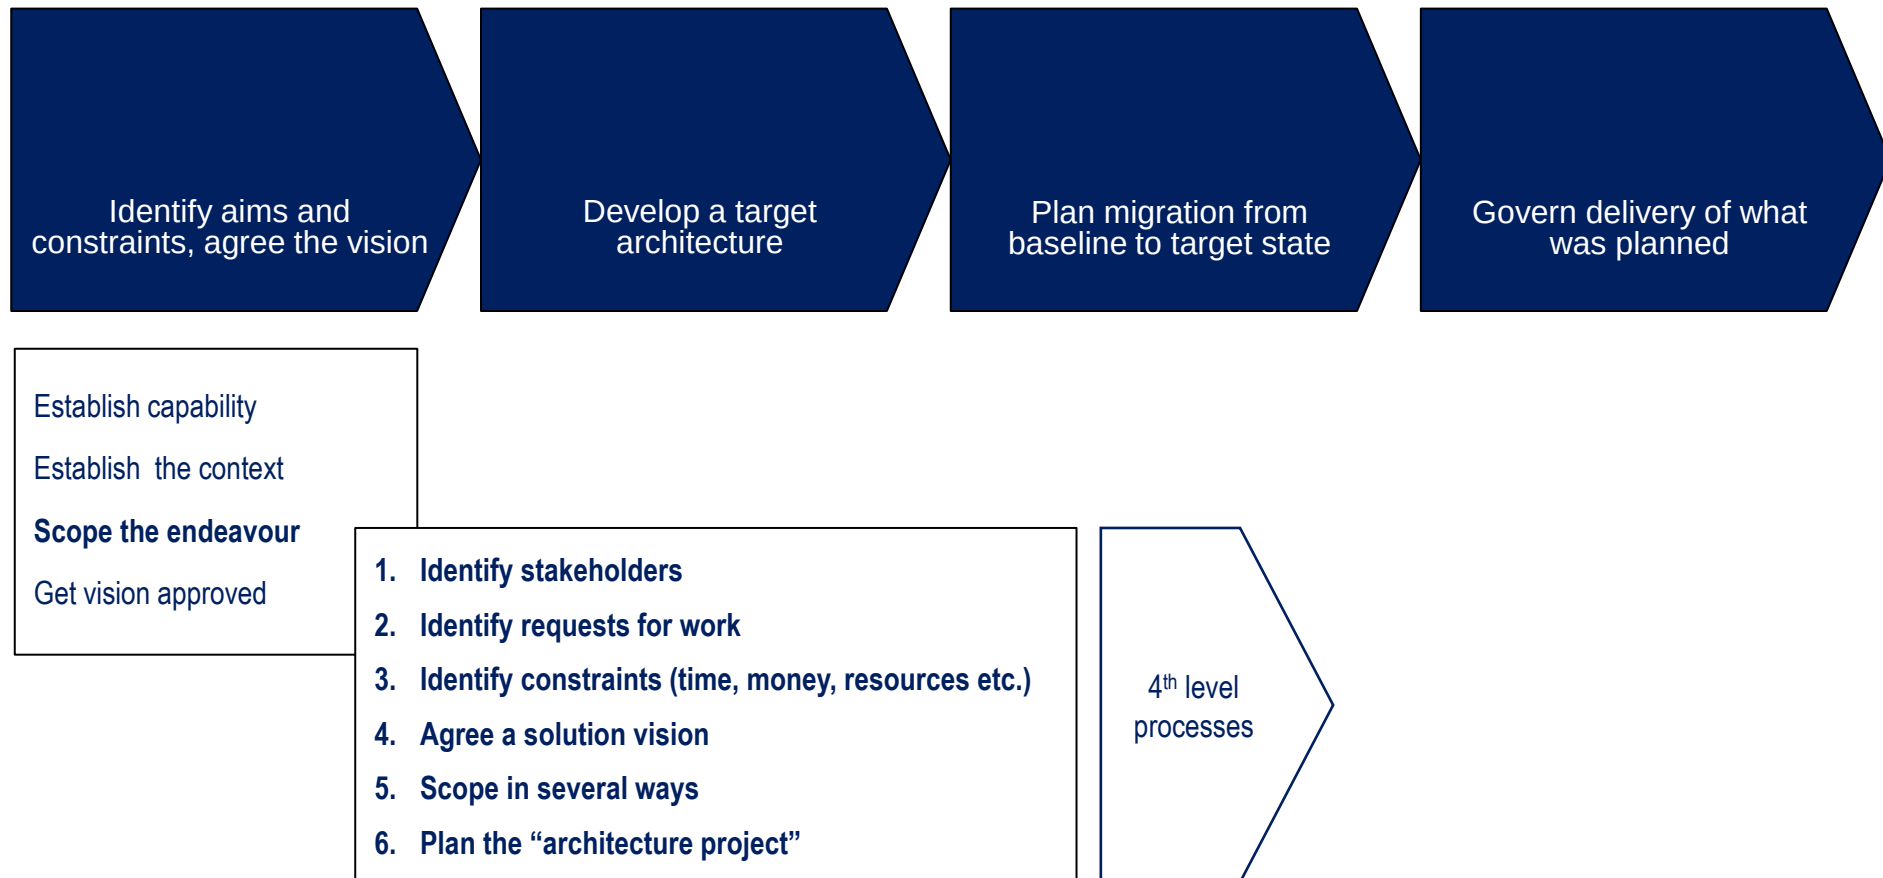

Establish the context

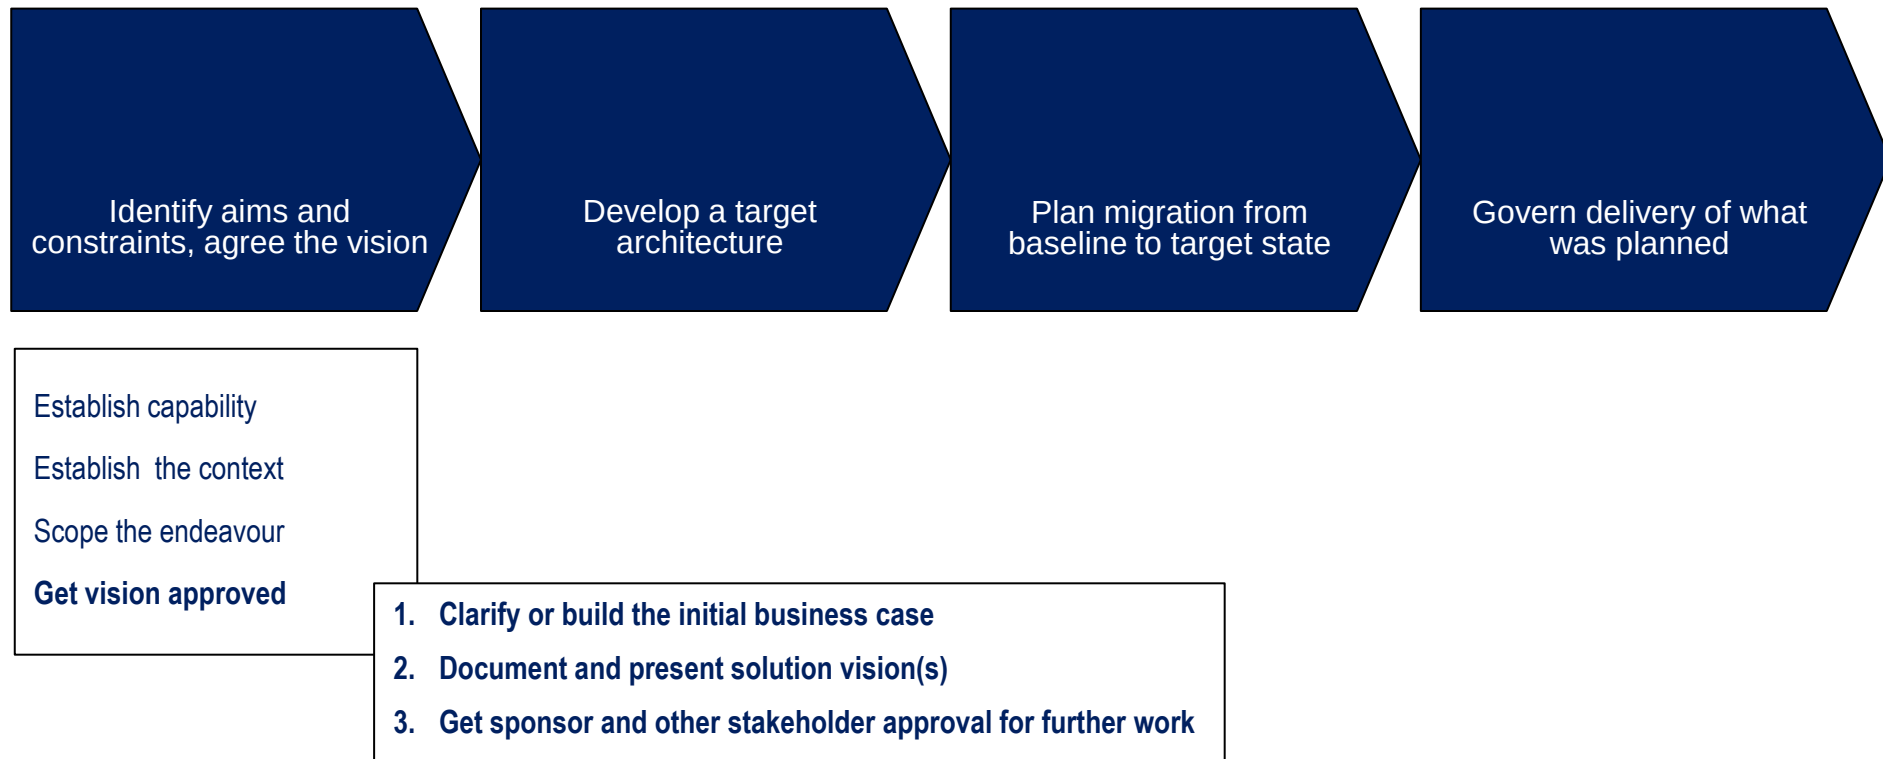

Scope the endeavour (EA)

Scope the endeavour (SA)

Get vision approved

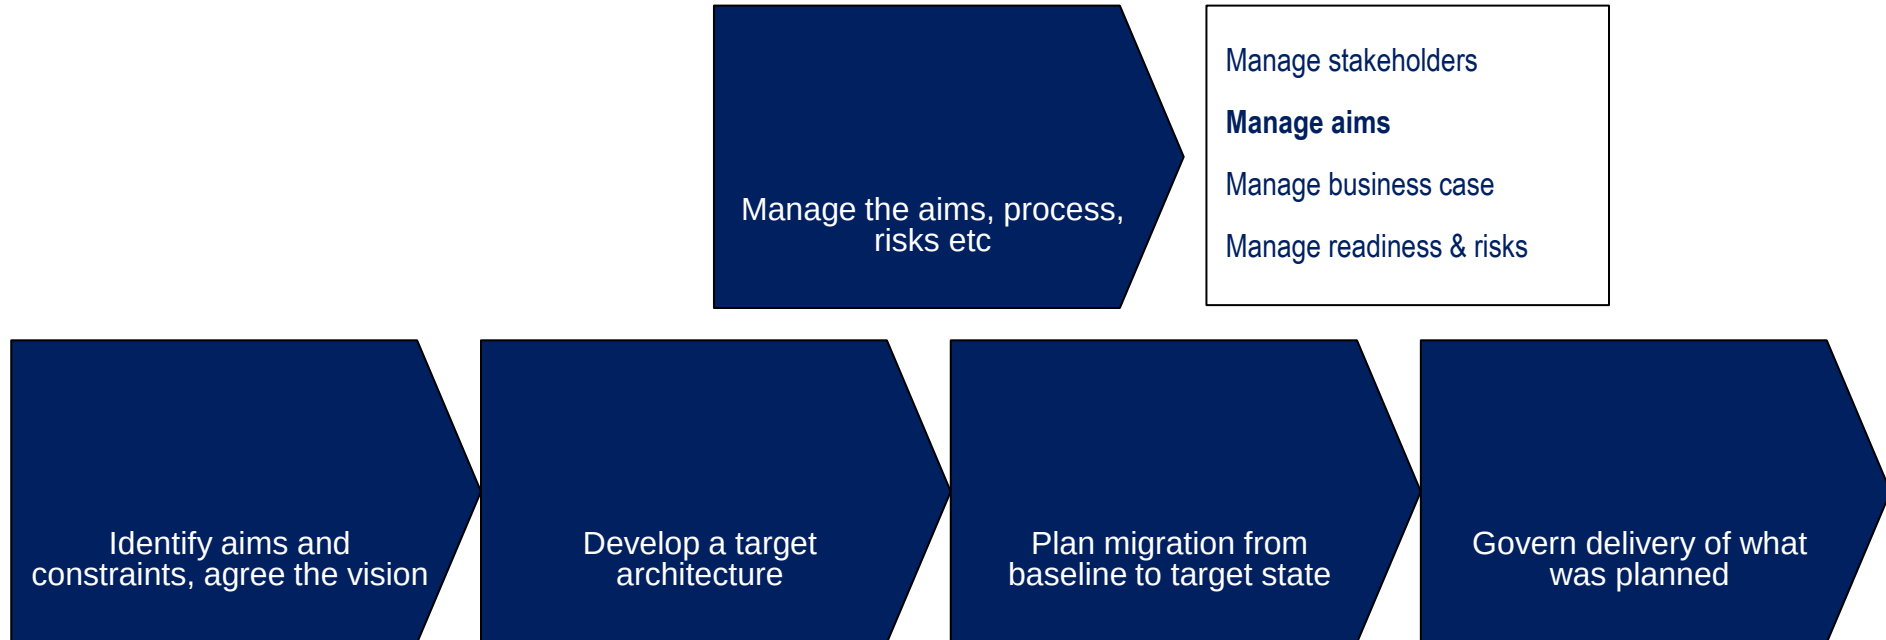

Manage stakeholders

-

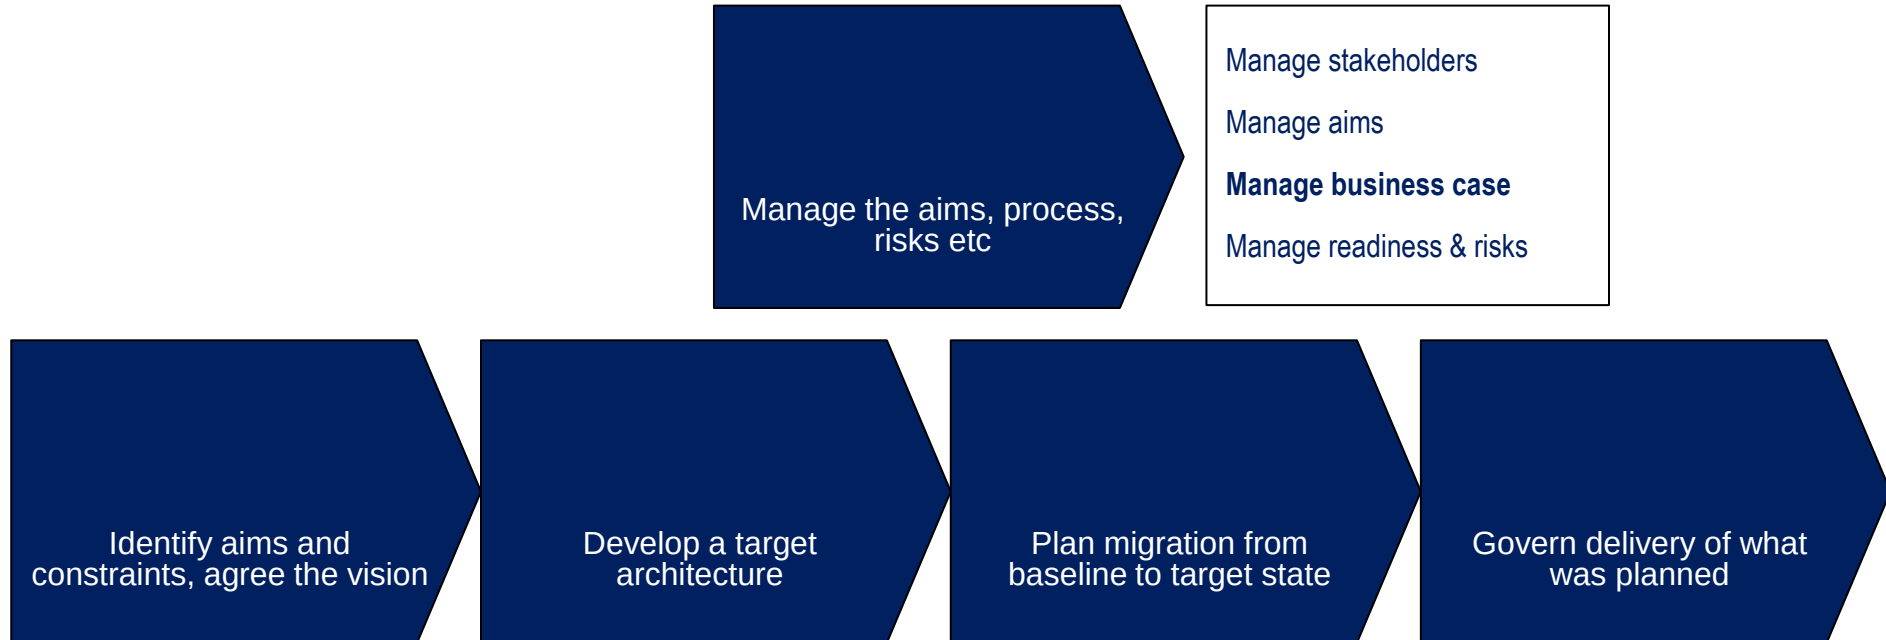

Manage aims

-

Manage business case

-

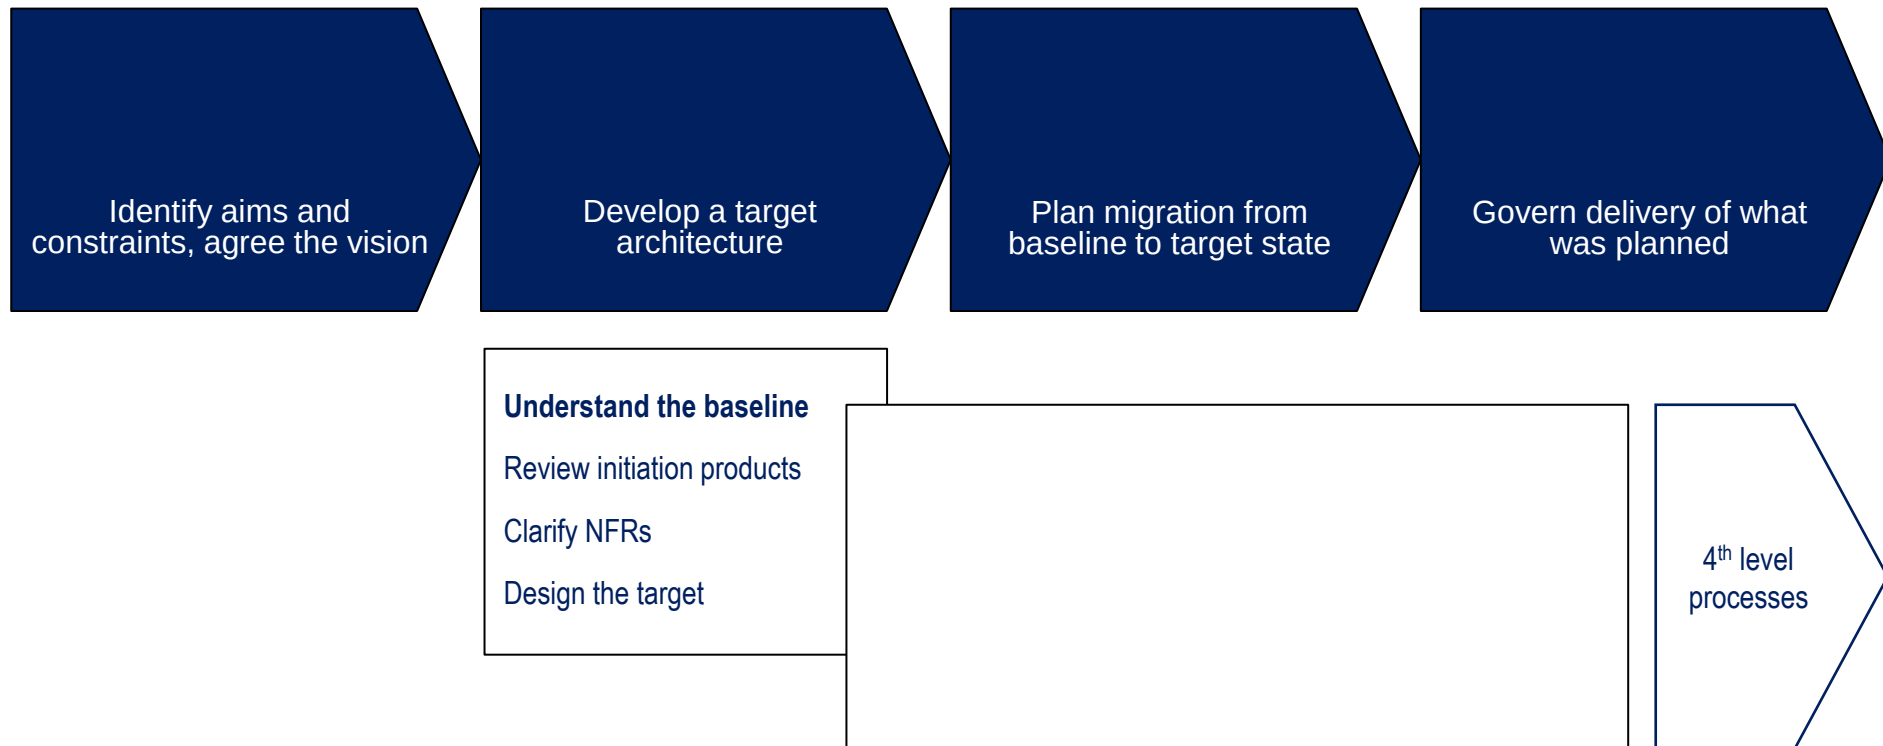

Manage readiness & risks

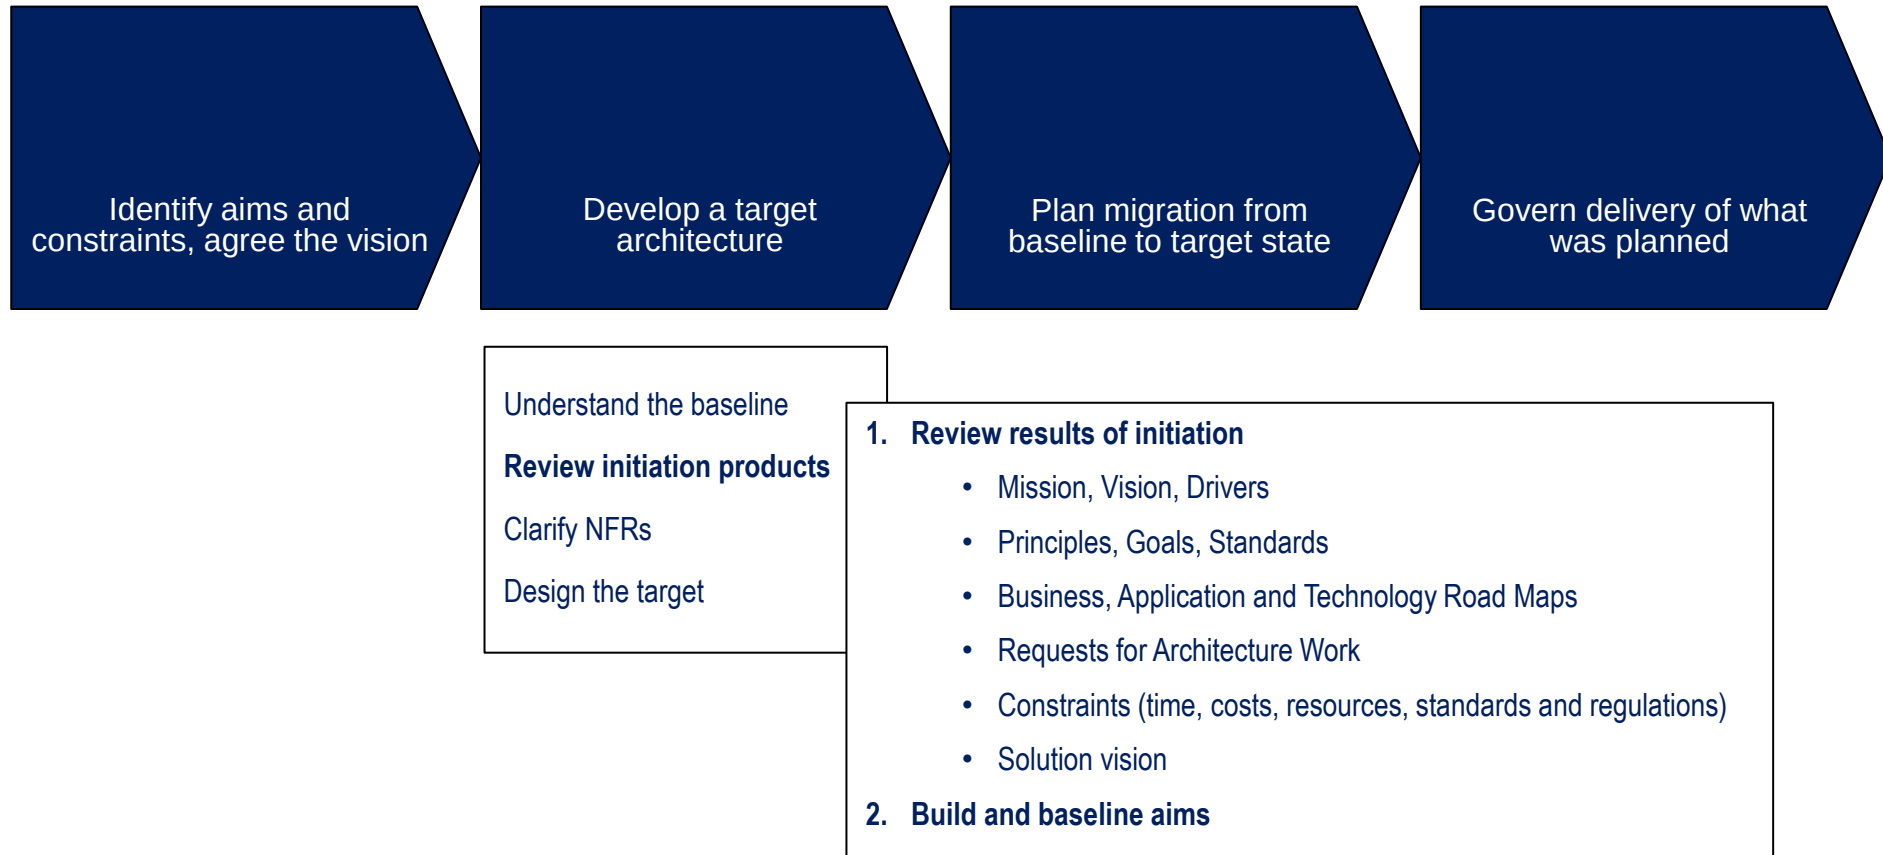

-

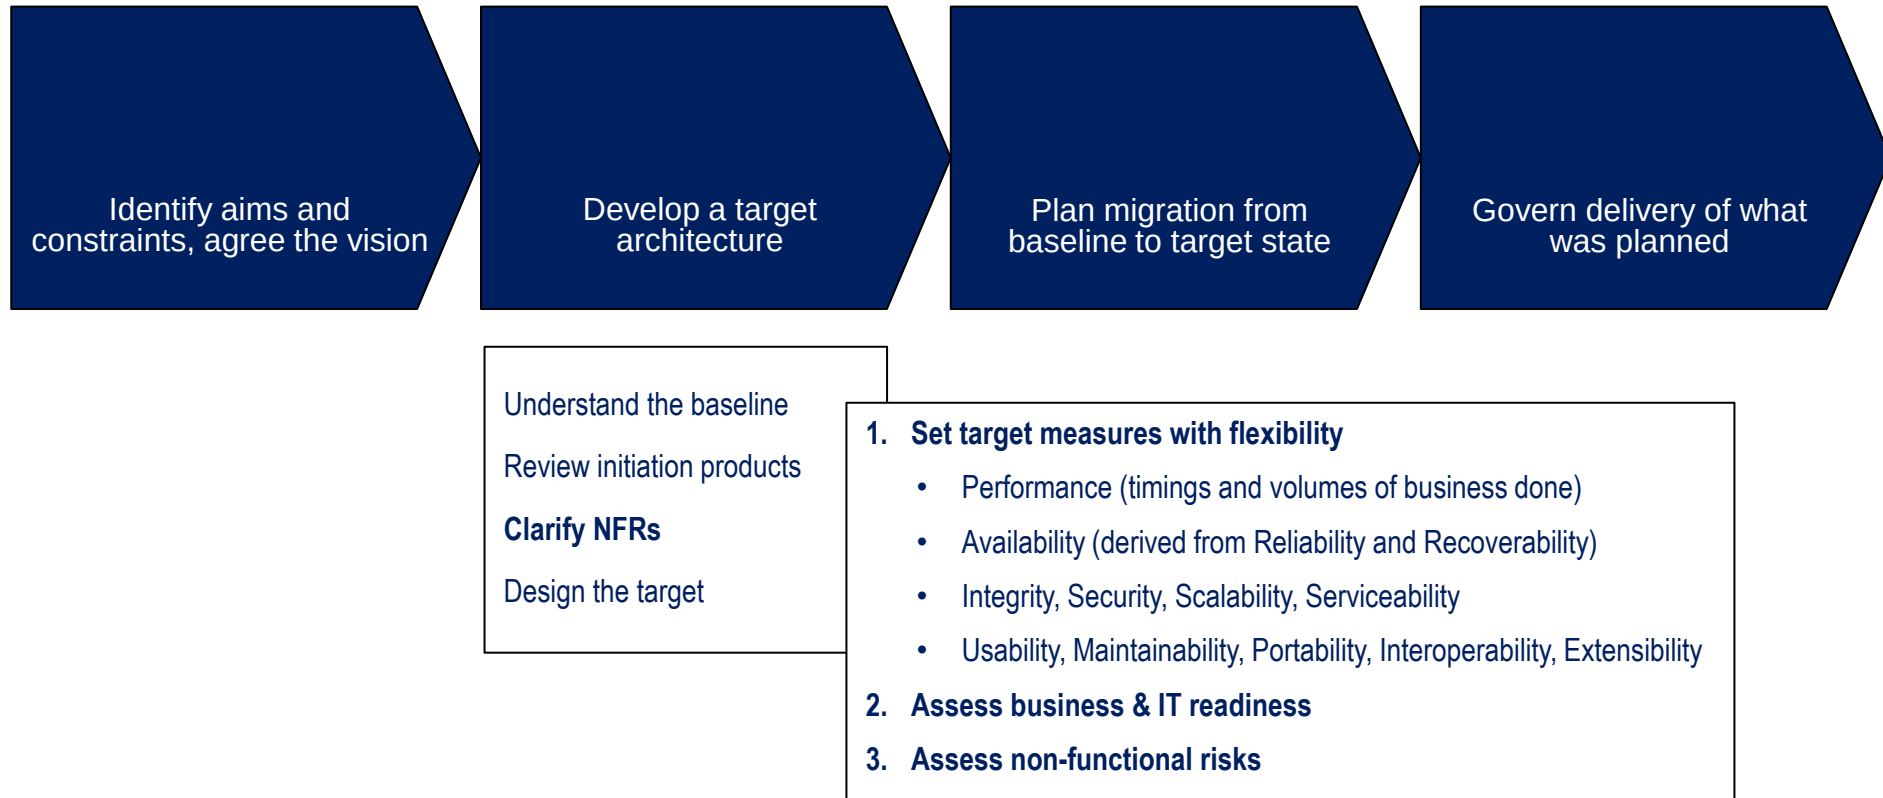

Understand the baseline

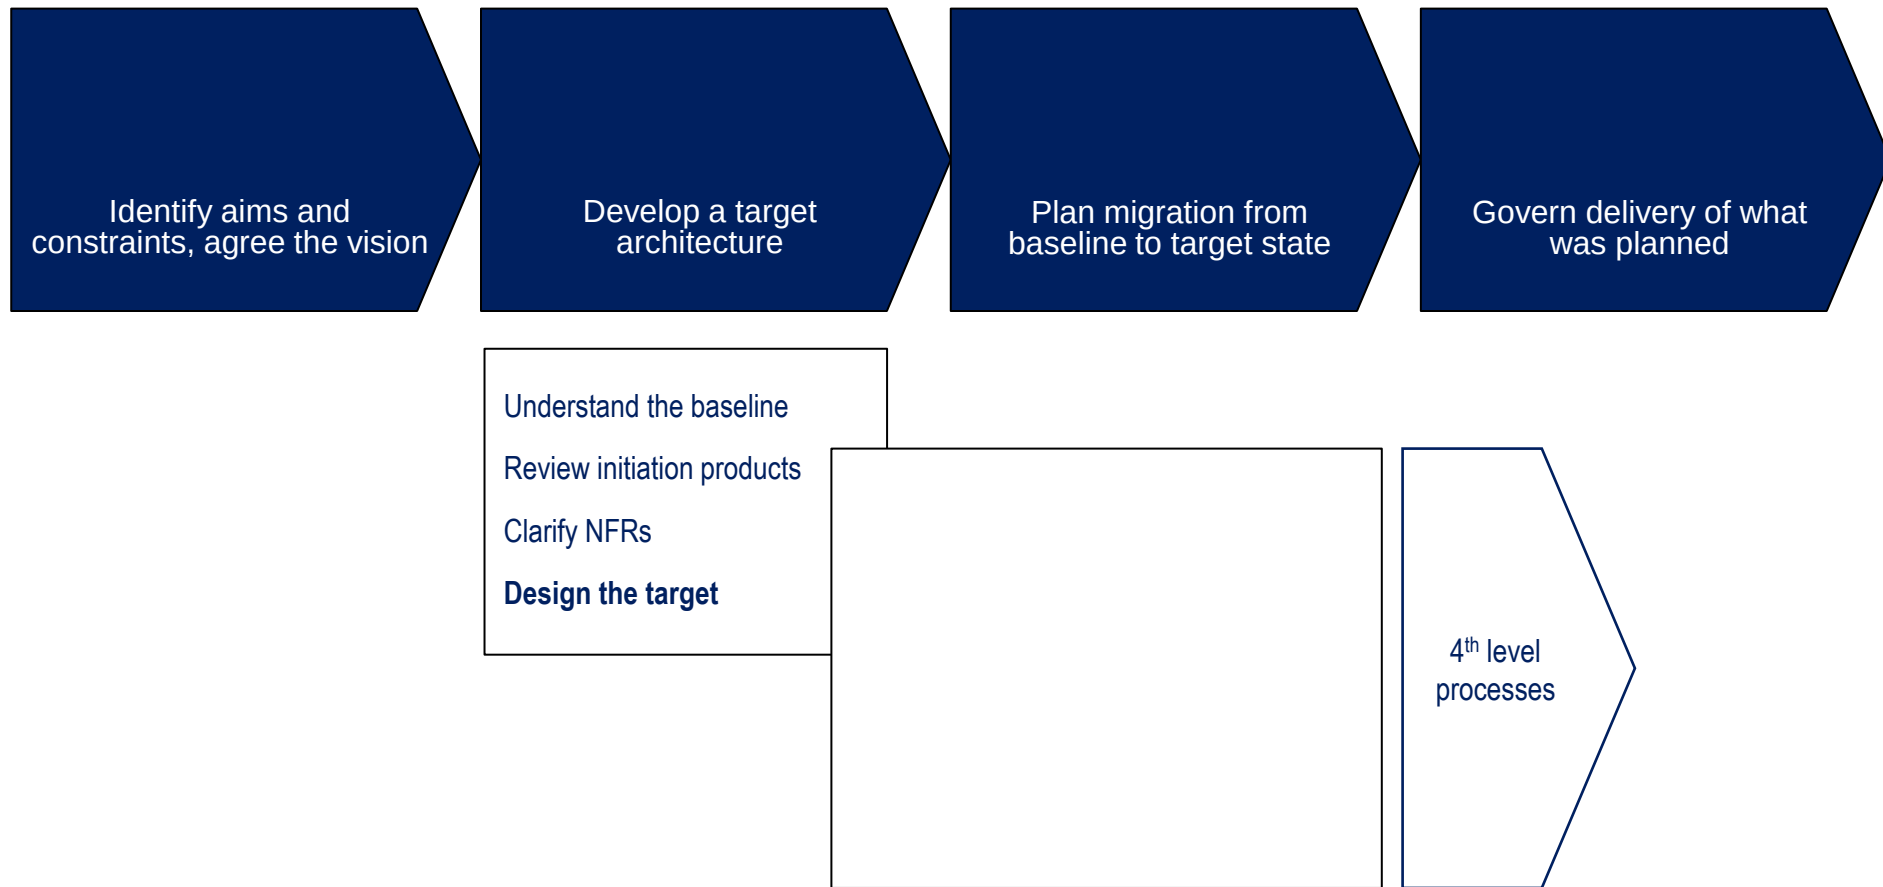

Review initiation products

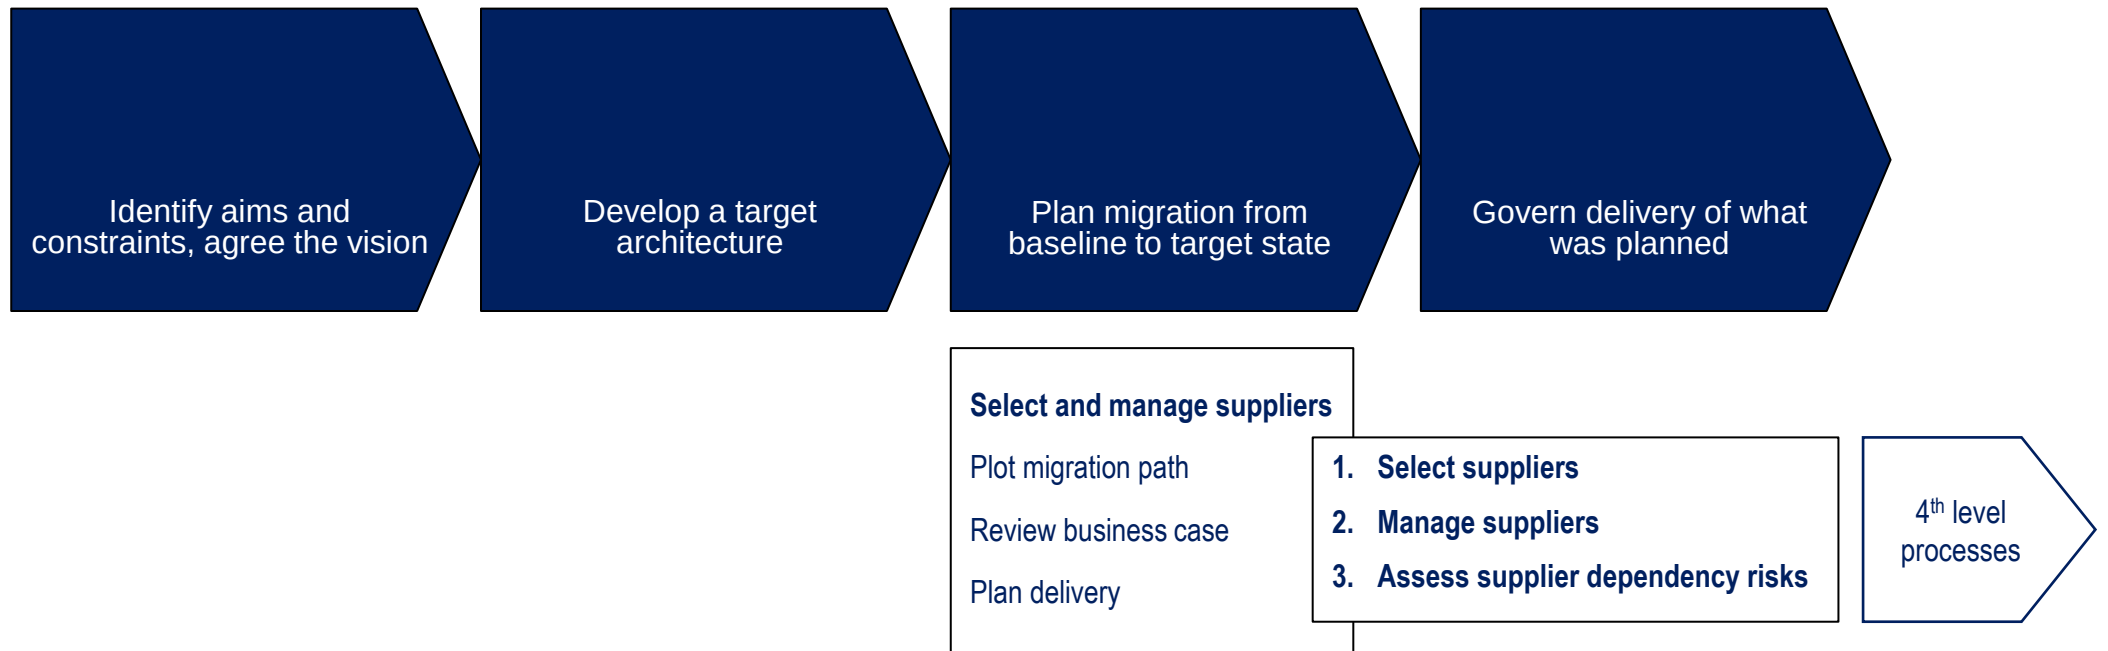

Clarify NFRs

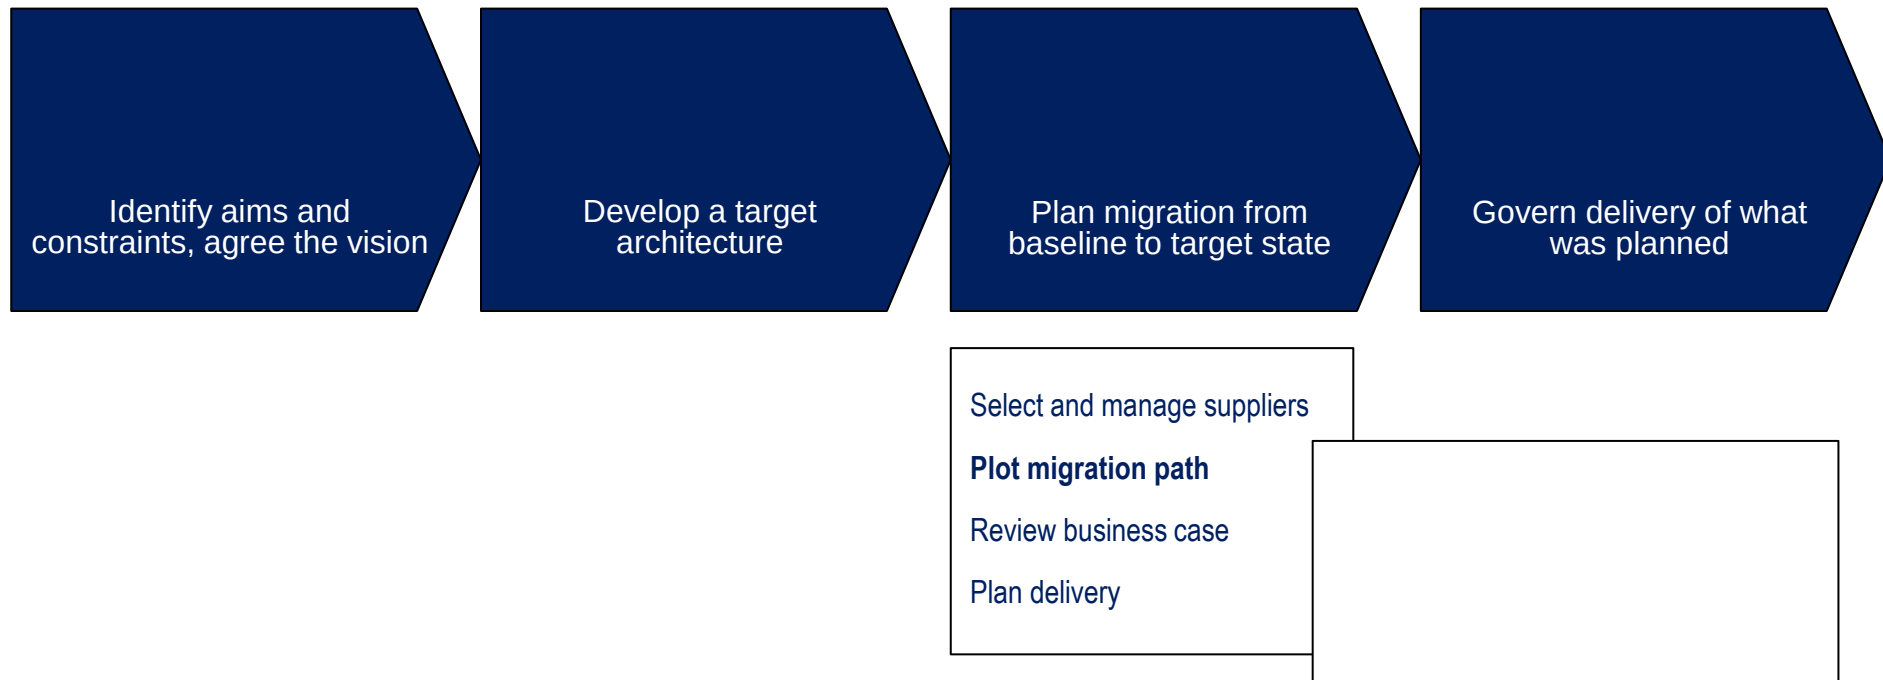

Design the target

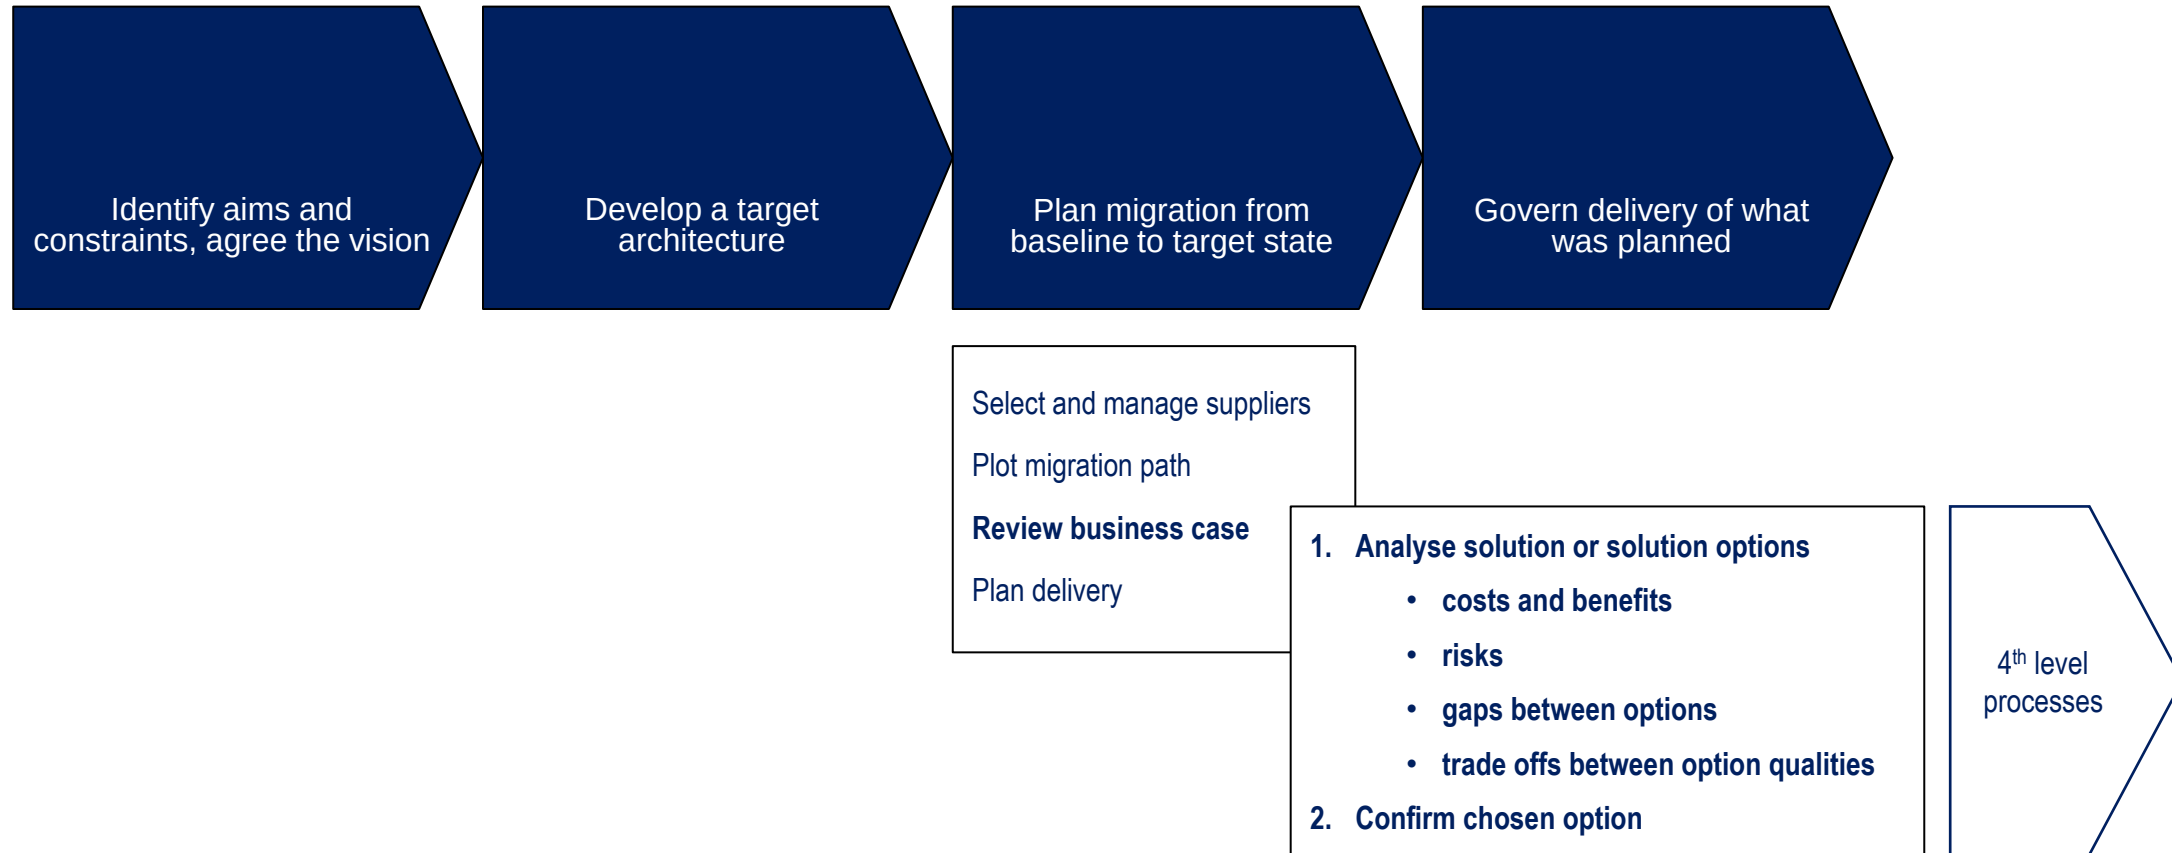

Select and manage suppliers

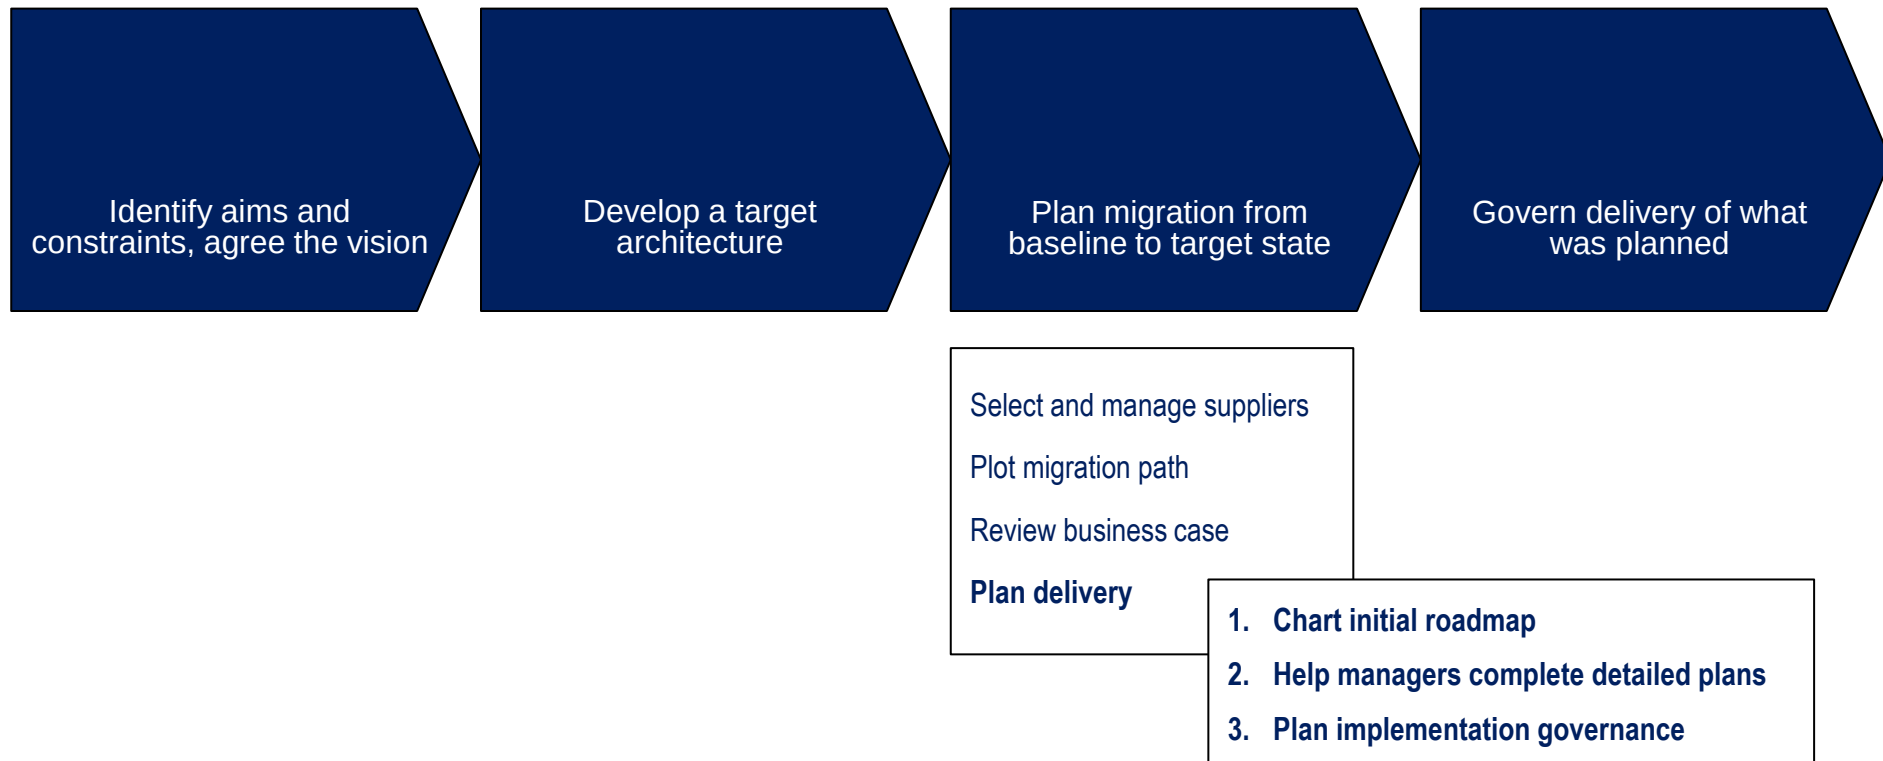

Plot migration path

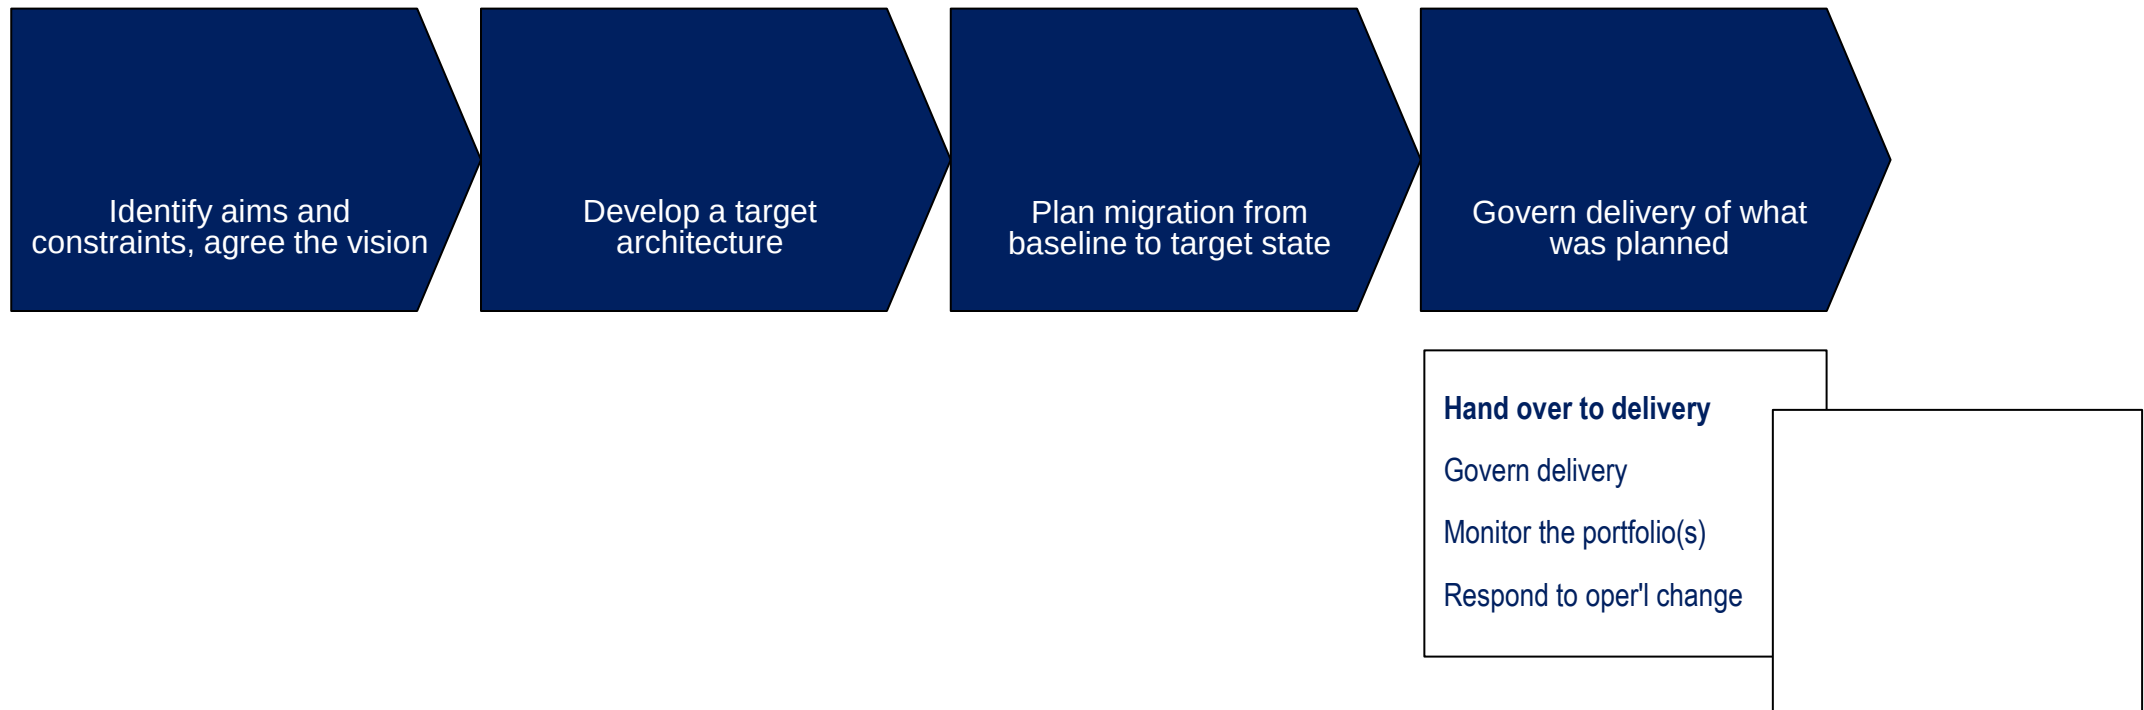

Review business case

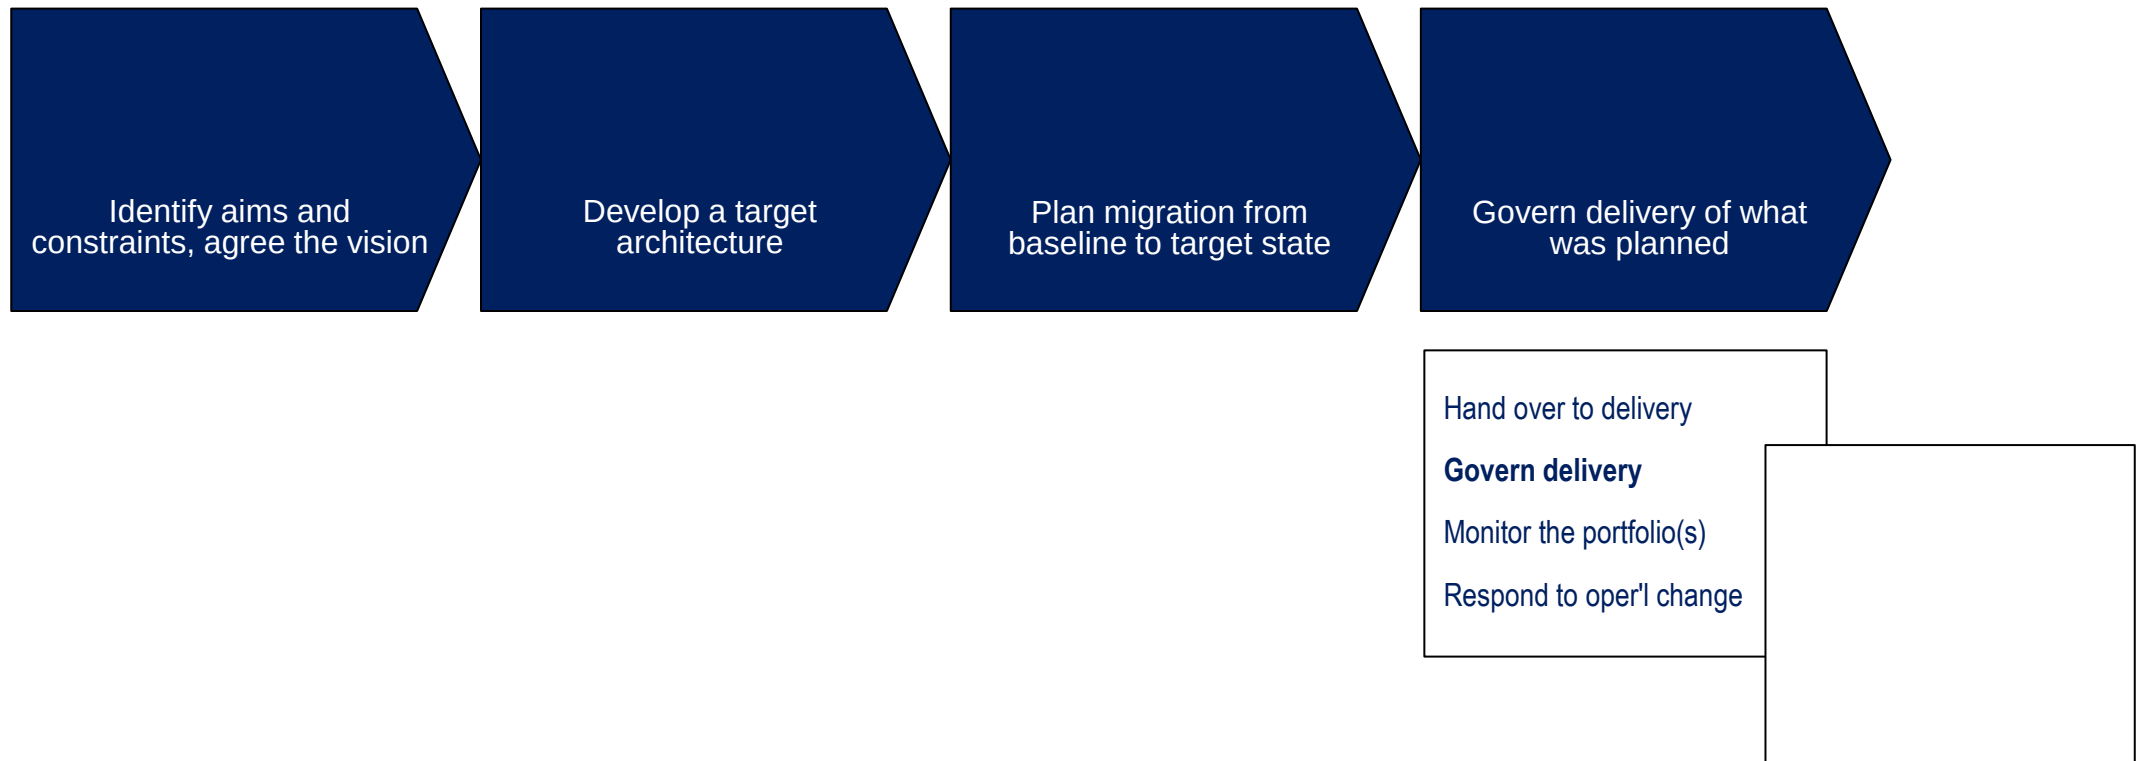

Plan delivery

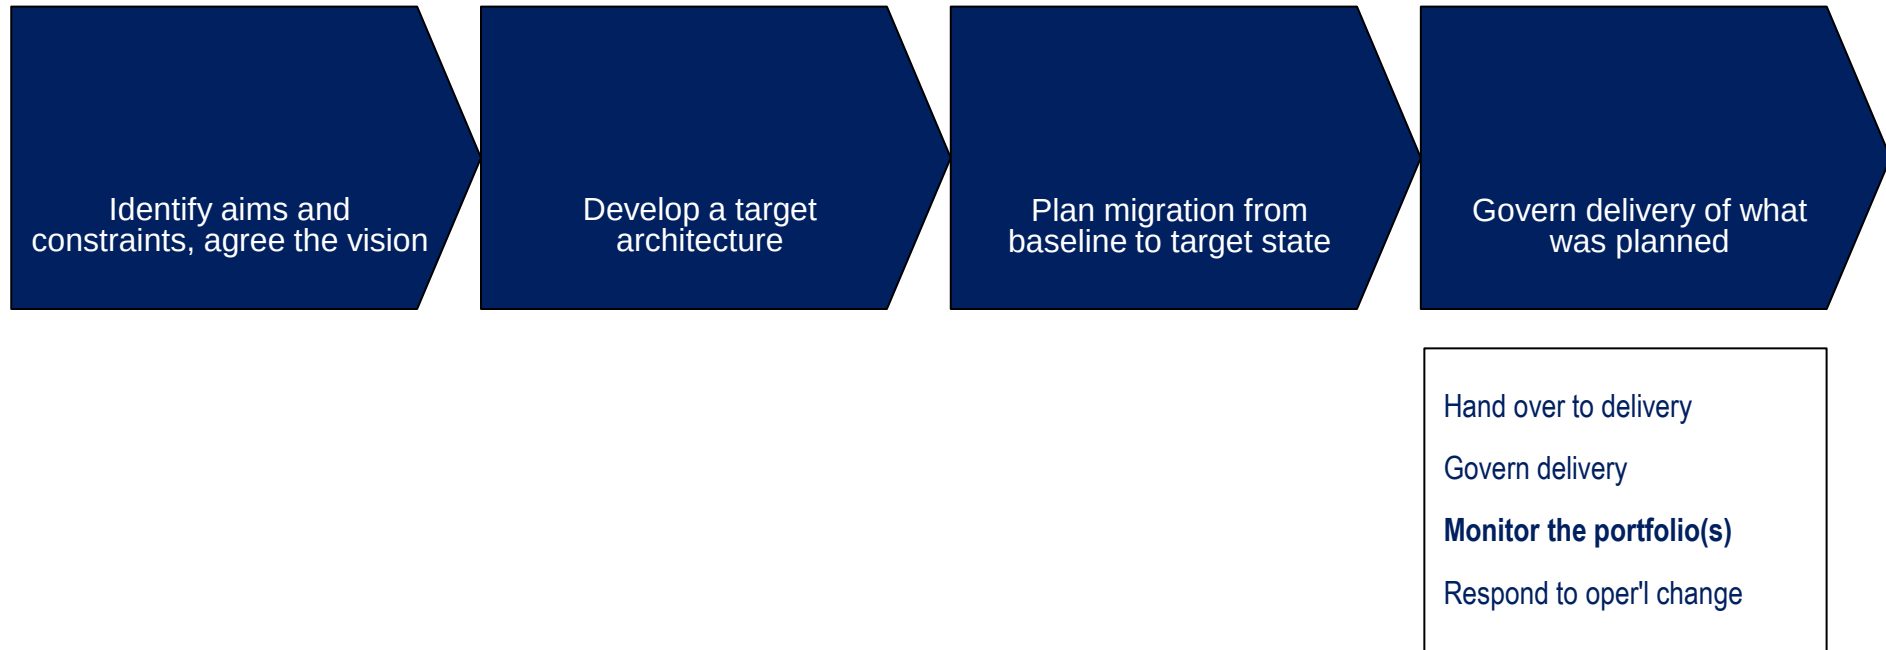

Hand over to delivery

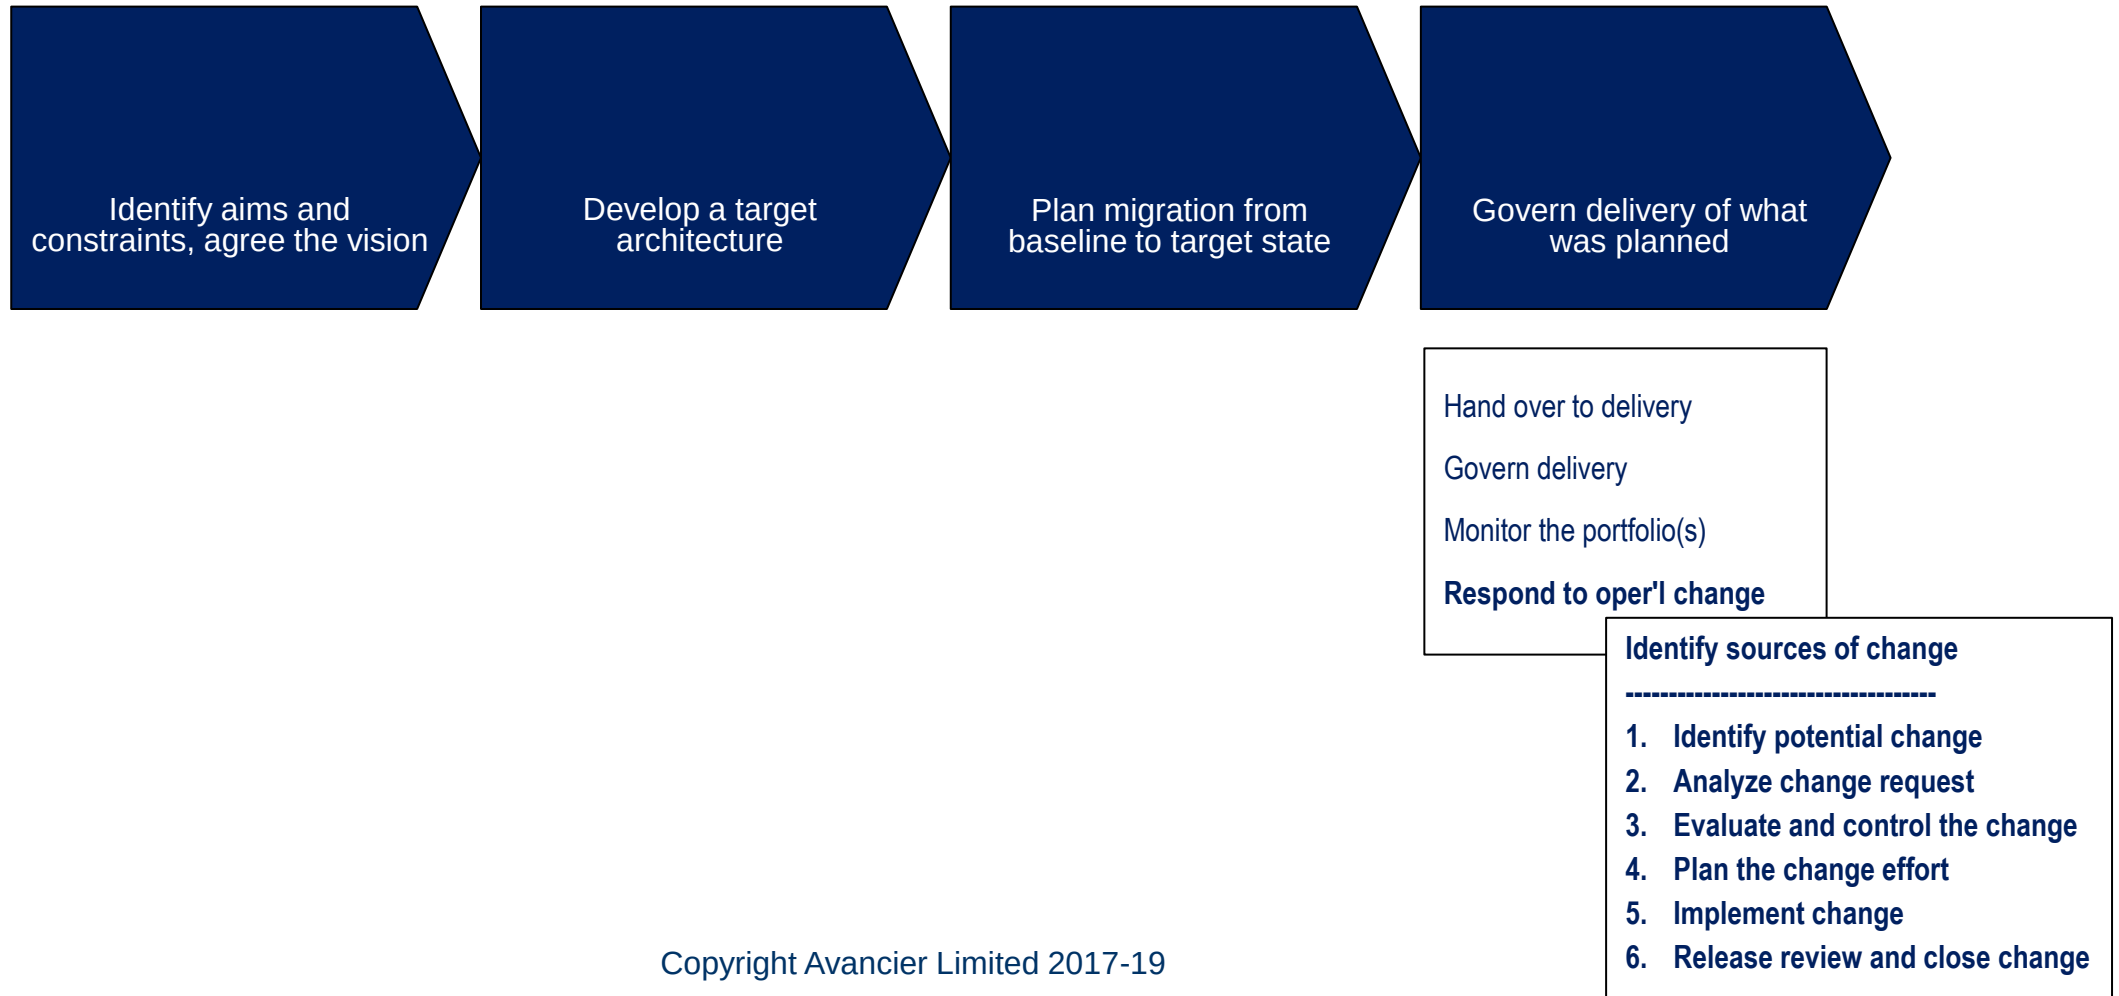

Govern delivery

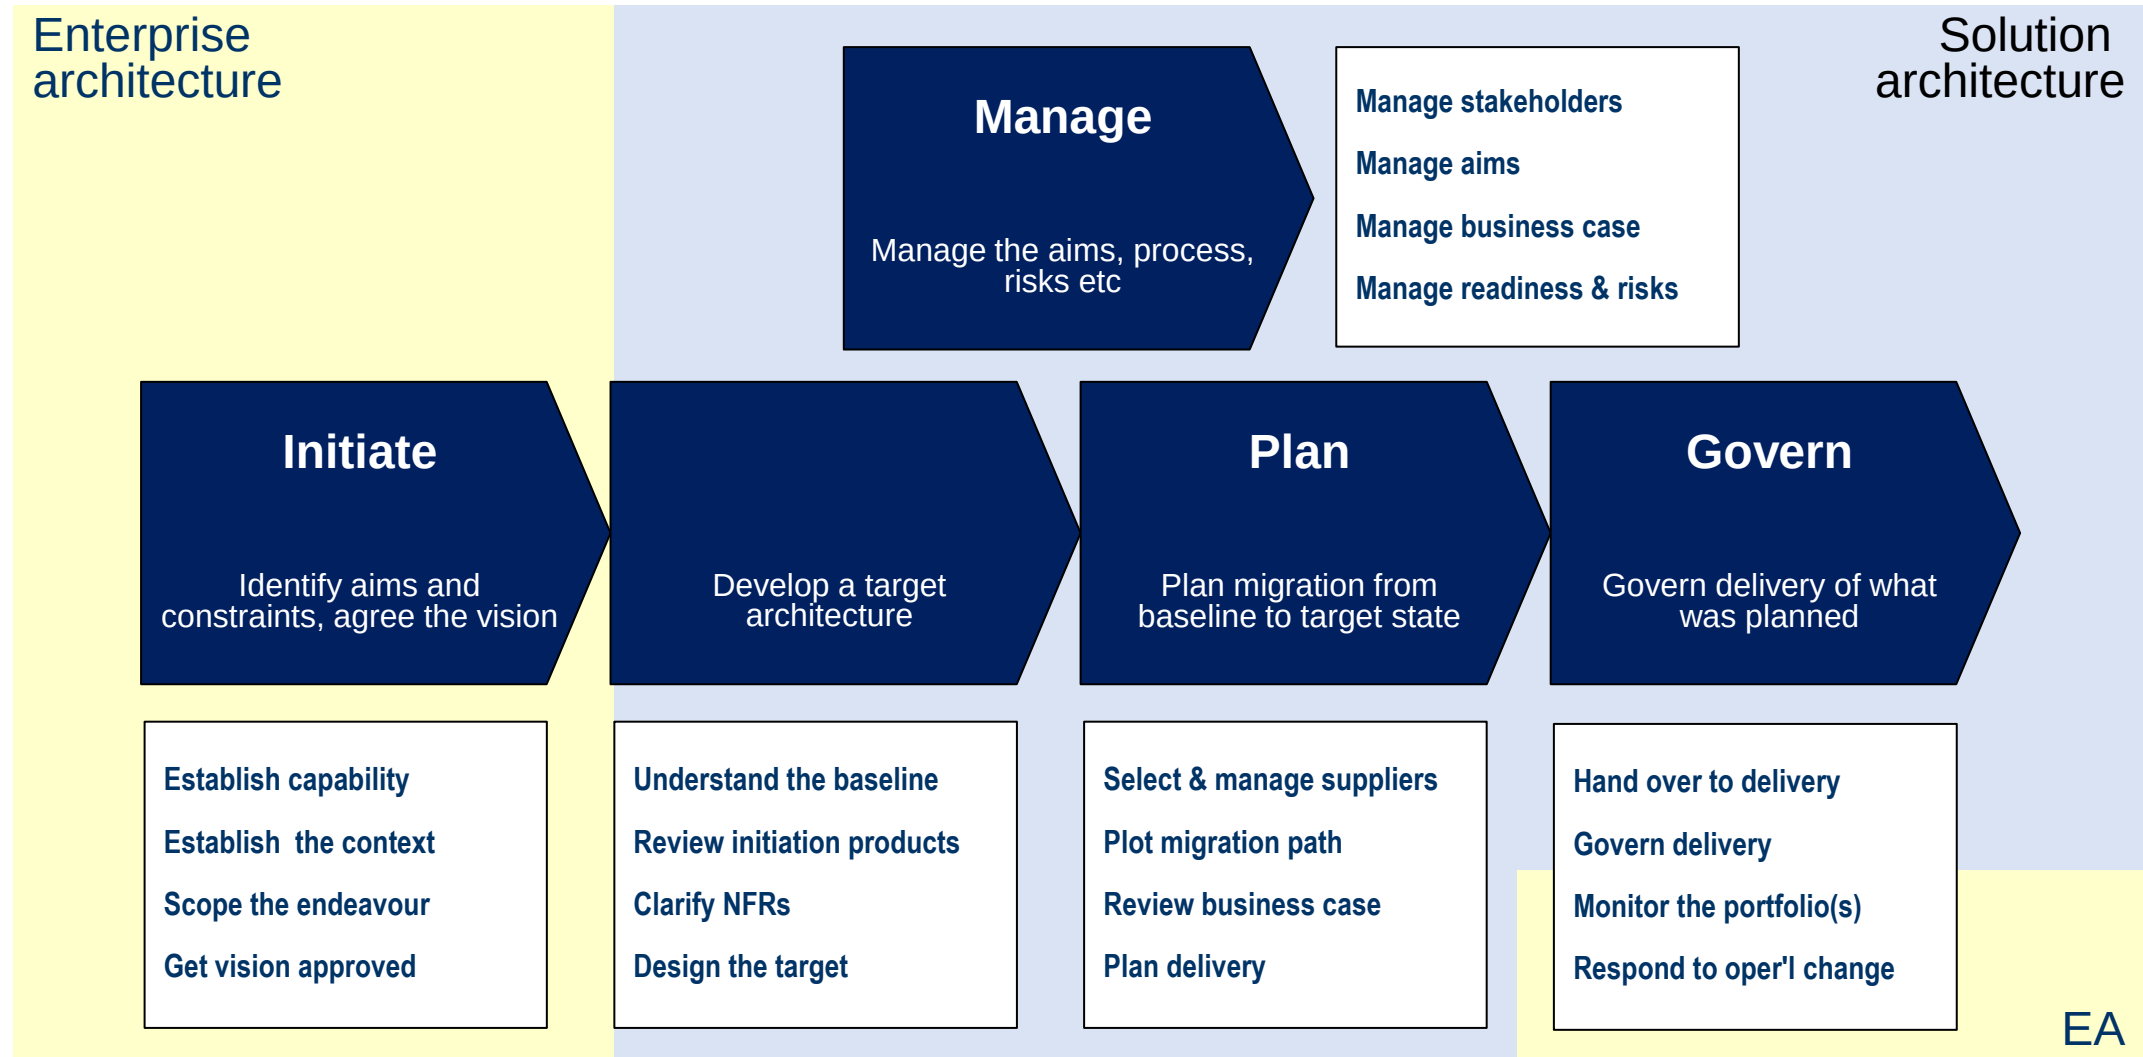

Monitor the portfolio(s)

Respond to operational change

A naive EA/SA division (the reality is more complex)
