

Smart Enterprise Architecture Governance in an Agile World

Business Stimuli
(e.g. M&A activity, new digital business models)

- Enterprise Architecture Governance**
- Implement a system of controls
 - Ensure compliance with internal and external standards and regulations
 - Establish processes that support effective architectural management
 - Develop practices that ensure accountability

- Benefits**
- ✓ Establish common vision
 - ✓ Improve alignment with business and IT
 - ✓ Improve business agility
 - ✓ Reduce business and IT risk
 - ✓ Create technology-based innovations
 - ✓ Standardize technology and process
 - ✓ Optimize cost
 - ✓ Reduce complexities of technology & process

- Guiding Principles**
1. Adhere to procedures, processes, and structures
 2. Create transparency of decisions and actions implemented
 3. Give independence to stakeholders to avoid conflicts of interests
 4. Ensure accountability of actions and decisions
 5. Be responsible for the organization and its stakeholders
 6. Do not create unfair advantage(s) to anyone involved
